

CLEAN ENERGY & MANUFACTURING INVESTMENTS: CALIFORNIA'S TWENTIETH DISTRICT

Since 2022, there has been an energy and manufacturing boom spurring economy-wide benefits across the nation thanks to new and extended clean investments. Many of these tax credits have historically enjoyed bipartisan, widespread support in Congress. It's critical that these credits are maintained to ensure that these generational investments and the revitalizing of American industry can continue.

California's Twentieth Congressional District

- **\$5.1 billion** has been invested since Q3 2022.
- 54% of announced investments—**\$6 billion out of \$11.1 billion**—would be in jeopardy if energy and manufacturing tax credits are repealed or modified.
- More than **3,600 jobs** from completed facilities with over **6,600 additional outstanding and potentially at-risk jobs** in CA-20.

Clean Energy & Manufacturing Investments in California

California-Wide

- **\$33.6 billion** invested in the state to through December 2024; **\$38.3 billion** more announced and unspent, and potentially at risk.
- Investments have spurred more than **28,000 clean energy and manufacturing jobs** in California with over **38,800 additional outstanding and potentially at-risk jobs**.
- California is highly vulnerable to cuts or changes to tech neutral credits: estimated **9.6% increase in residential electricity prices and 12.8% increase for commercial electricity prices over the next three years**.

Data on this page comes from multiple sources. All investment data comes from *Rhodium Group and MIT CEEPR's Clean Investment Monitor*. All jobs data is from the *Clean Economy Tracker* and jobs numbers provide an overview of jobs across clean energy and manufacturing at active facilities in the state. Due to gaps in publicly available data, some investment and jobs data may be missing from each total and numbers may be greater. Energy price data can be found in reports by *Brattle for ConservAmerica* or *Aurora Energy Research*.

The Center for Climate and Energy Solutions (C2ES) is an independent, nonpartisan, nonprofit organization working to secure a safe and stable climate by accelerating the global transition to net-zero greenhouse gas emissions and a thriving, just, and resilient economy.
