

CLEAN ENERGY & MANUFACTURING INVESTMENTS: GEORGIA'S FIRST DISTRICT

Since 2022, there has been an energy and manufacturing boom spurring economy-wide benefits across the nation thanks to new and extended clean investments. Many of these tax credits have historically enjoyed bipartisan, widespread support in Congress. It's critical that these credits are maintained to ensure that these generational investments and the revitalizing of American industry can continue.

Georgia's First Congressional District

- **\$7.9 billion** has been invested since Q3 2022.
- The **second largest level of investment** to date across all congressional districts in the nation.
- More than **3,500 jobs** from completed facilities with over **8,700 additional outstanding and potentially at-risk jobs** in GA-01.

Clean Energy & Manufacturing Investments in Georgia

Georgia-wide

- **\$22 billion** invested in the state to through December 2024; \$7.2 billion more announced and unspent, and potentially at risk.
- Investments have spurred more than **27,600 clean energy and manufacturing jobs** in Georgia with over **32,800 additional outstanding and potentially at-risk jobs**.
- The **3rd largest level of investment** to date in the nation.

All investment and jobs data comes from *Rhodium Group and MIT CEEPR's Clean Investment Monitor*. Jobs totals from completed facilities include both construction and operational jobs; and outstanding job totals include both construction and operational jobs from facilities not yet online as of the end of 2024. Due to gaps in publicly available data, some investment and jobs data may be missing from each total. Project data can be found at energymomentum.us and additional energy price data can be found in reports by *Brattle* for ConservAmerica or *Aurora Energy Research*.
