

CLEAN ENERGY & MANUFACTURING INVESTMENTS: NORTH CAROLINA'S SIXTH DISTRICT

Since 2022, there has been an energy and manufacturing boom spurring economy-wide benefits across the nation thanks to new and extended clean investments. Many of these tax credits have historically enjoyed bipartisan, widespread support in Congress. It's critical that these credits are maintained to ensure that these generational investments and the revitalizing of American industry can continue.

North Carolina's Sixth Congressional District

- **\$52.8 million** has been invested since Q3 2022.
- **90% of announced investments**—\$487.7 million out of \$540.5 million—would be in jeopardy if energy and manufacturing tax credits are repealed or modified.
- There are over 500 outstanding and potentially at-risk jobs in NC-6.

Clean Energy & Manufacturing Investments in North Carolina

North Carolina-Wide

- Nearly **\$12 billion** invested in the state to through December 2024; \$11.2 billion more announced and unspent, and potentially at risk.
- Investments have spurred more than **4,000 clean energy and manufacturing jobs** in North Carolina with over 35,000 additional outstanding and potentially at-risk jobs.
- North Carolina is highly vulnerable to cuts or changes to tech neutral credits: estimated **13.5% increase in residential electricity prices and 21.2% increase for commercial electricity prices** over the next three years.

All investment and jobs data comes from *Rhodium Group and MIT CEEPR's Clean Investment Monitor*. Jobs totals from completed facilities include both construction and operational jobs; and outstanding job totals include both construction and operational jobs from facilities not yet online as of the end of 2024. Due to gaps in publicly available data, some investment and jobs data may be missing from each total. Project data can be found at energymomentum.us and additional energy price data can be found in reports by *Brattle* for ConservAmerica or *Aurora Energy Research*.
