

# CLEAN ENERGY & MANUFACTURING INVESTMENTS: NEBRASKA'S SECOND DISTRICT

Since 2022, there has been an energy and manufacturing boom spurring economy-wide benefits across the nation thanks to new and extended clean investments. Many of these tax credits have historically enjoyed bipartisan, widespread support in Congress. It's critical that these credits are maintained to ensure that these generational investments and the revitalizing of American industry can continue.

## Nebraska's Second Congressional District

- \$87.8 million has been invested since Q3 2022.

## Clean Energy & Manufacturing Investments in Nebraska

Data on this page comes from multiple sources. All investment data comes from *Rhodium Group* and *MIT CEEPR's Clean Investment Monitor*. All jobs data is from the *Clean Economy Tracker* and jobs numbers provide an overview of jobs across clean energy and manufacturing at active facilities in the state. Due to gaps in publicly available data, some investment and jobs data may be missing from each total and numbers may be greater. Energy price data can be found in reports by *Brattle for ConservAmerica* or *Aurora Energy Research*.

## Nebraska-Wide

- \$1.6 billion invested in the state from Q3 2022 to Q4 2024
- 83 percent—or \$7.6 billion more in announced and unspent investments—is potentially at risk.
- Investments have spurred 400 clean energy and manufacturing jobs in the Cornhusker State.
- Nebraska is highly vulnerable to cuts or changes to tech neutral credits: estimated 9.1% increase in residential electricity prices and 12.9% increase for commercial electricity prices over the next three years.

The Center for Climate and Energy Solutions (C2ES) is an independent, nonpartisan, nonprofit organization working to secure a safe and stable climate by accelerating the global transition to net-zero greenhouse gas emissions and a thriving, just, and resilient economy.
