

CLEAN ENERGY & MANUFACTURING INVESTMENTS: OREGON'S SECOND DISTRICT

Since 2022, there has been an energy and manufacturing boom spurring economy-wide benefits across the nation thanks to new and extended clean investments. Many of these tax credits have historically enjoyed bipartisan, widespread support in Congress. It's critical that these credits are maintained to ensure that these generational investments and the revitalizing of American industry can continue.

Oregon's Second Congressional District

- **\$888 million** has been invested since Q3 2022.
- An additional **\$7.3 billion in announced but unspent investments** would be in jeopardy if energy and manufacturing tax credits were repealed or modified.
- There are over 1,100 jobs already created in the district from these investments, with over **7,500 outstanding and potentially at-risk jobs in OR-02**.

Clean Energy & Manufacturing Investments in Oregon

Oregon-wide

- **\$2 billion invested in the state** through December 2024; \$10.8 billion more announced and unspent, and potentially at risk.
- Investments have spurred more than 1,500 clean energy and manufacturing jobs in Oregon with **over 9,600 additional outstanding and potentially at-risk jobs**.

All investment and jobs data comes from *Rhodium Group and MIT CEEPR's Clean Investment Monitor*. Jobs totals from completed facilities include both construction and operational jobs; and outstanding job totals include both construction and operational jobs from facilities not yet online as of the end of 2024. Due to gaps in publicly available data, some investment and jobs data may be missing from each total. Project data can be found at energymomentum.us and additional energy price data can be found in reports by *Brattle for ConservAmerica* or *Aurora Energy Research*.

The Center for Climate and Energy Solutions (C2ES) is an independent, nonpartisan, nonprofit organization working to secure a safe and stable climate by accelerating the global transition to net-zero greenhouse gas emissions and a thriving, just, and resilient economy.
